

As the vibrant spring weather sweeps across New York and beyond, luxury condos across the United States are leveraging the power of natural light, fresh air, and water features to promote wellness and enhance the living experience. This trend is fueled by the rising popularity of biophilia, a design philosophy that prioritizes the human connection to the natural world. In response to this demand, luxury condos are adopting unique architecture, innovative window systems, and indoor-outdoor designs that enable residents to engage with nature and promote wellness.

Olara – West Palm Beach, FL

Olara, West Palm Beach's most captivating new residential address, promises effortless, luxurious living with resort-inspired amenities and premium hospitality and service. Developed by Savanna, the 26-story tower designed by award-winning architecture firm Arquitectonica is crafted to connect residents to South Florida's natural light and tranquil ocean views, offering 275 two-to-four bedroom plus den residences that appeal to buyers seeking an organic living experience. With interiors by Gabellini Sheppard Associates, the residences feature floor-to-ceiling windows that offer breathtaking views of the Intracoastal Waterway, Palm Beach Island, and Atlantic Ocean, opening to spacious 10-foot deep outdoor terraces that blend the indoors with the balmy West Palm environment. The exterior of the tower, inspired by natural and yacht architecture, features sleek glass design and unique curved corners that invite natural light throughout the building. Olara's residents-only marina and waterfront amenities include a houseboat that embodies the building's natural aesthetic. With prices starting at \$2 million, Olara is the ultimate expression of inspired living in West Palm Beach.
