

As we enter the spring season, many luxury condos throughout the US are taking a fresh approach to architecture and design by promoting well-being through nature.

From fresh air and natural light to water features and indoor-outdoor spaces, these condos are incorporating biophilic design principles to enhance residents' health and happiness.

In this round-up, we'll take a look at five luxury condos that are embracing biophilia and providing residents with a connection to the natural world.

## Olara

Located in West Palm Beach, Olara offers resort-inspired amenities, premium hospitality and service, and 275 two-to-four-bedroom plus den residences that provide residents with an inspired natural and organic living experience.

Developed by Savanna and designed by award-winning architecture firm Arquitectonica, the tower was crafted to connect residents to South Florida's abundance of natural light and tranquility of the ocean.

With interiors by Gabellini Sheppard Associates, the residences reflect an elegant harmony of natural elements with floor-to-ceiling windows that overlook the Intracoastal Waterway, Palm Beach Island, and Atlantic Ocean, and open up to 10-foot deep outdoor terraces to offer ample usable space and seamlessly bridge the interiors to West Palm's balmy environment.

### Conclusion

As biophilic design principles continue to rise in popularity, luxury condos across the US are embracing nature to provide residents with a connection to the [outdoors](#).

From sleek glass design to Swiss-engineered windows and advanced ventilation systems, these condos are promoting wellness through natural light, fresh air, and water features. By incorporating biophilic design principles into their architecture and design, these luxury condos are setting a new standard.
